1	COMMENTS
2	Need full day with practical application to technology
3	Written handouts with references and web addresses to visit that were mentioned.
4	Practical application was missing
5	Lecture was entertaining, motivational and inspirational - great but the need to go the next step- seize the motivation and start to play with the technology. Follow up workshop either a full day with afternoon dedicated to 'doing and 'playing ' with the technology

8	what soft ware? Where to go for training in actually creating ppt as Les does (workshops rather than books however books displayed looked really helpful. Fabulous highly relevant. Loved it. I write training for a living. It will certainly change the way I do things.
9	The description should emphasis that ht process was the key aim not necessarily how to use PowerPoint. Completely relevant and practical. Perhaps and foll up to show how to do certain things on PowerPoint that were part of demonstration. Also another on workshop how to develop
